Installation Instructions

1. Install the **slide bar assembly (1)** per the installation instructions of the PB-2524.
2. Flush the assembly to ensure there is no debris.
3. Thread the nut end of the **shower hose (2)** onto the outlet thread of the **slide bar assembly (1)**, making sure the rubber gasket is compressed.
4. Thread the cone end of the **shower hose (2)** onto the inlet thread of the **hand shower (3)**, again making sure the rubber gasket is compressed.
5. Insert the shower hose cone into the slider and adjust to desired position.
6. Turn on water and check for leaks.
7. Tension on the slider assembly can be adjusted via the two set screws accessible on the hook side. Tighten [clockwise] to increase tension. Adjust both evenly.

IMPORTANT INSTALLATION INFORMATION

- Professional installation is recommended for the slide bar assembly.
- Slide bars should not be used as grab bars.
- Check valves in the bottom post of the slide bar assembly and the inlet of the hand shower should not be removed.
- Refer to maintenance guide for finish care instructions.
